Diesel Power-Plus™ Concentrated Additive Formula

Water presence in diesel fuel remains the number one problem year round for diesel users. Now that low sulfur, ultra low sulfur and bio-diesel fuels account for the vast majority of diesel fuels used today, therefore, water contamination is now a bigger problem than ever before. Water damages injectors, creates gum, varnish and wax crystals; it interferes with fuel combustion creating and harboring microbes, fungi, and other contaminants.

Diesel Power-Plus contains the most effective combination of chemicals to absorb water from fuel, preventing damage, wear, and premature fuel pump failure. This product is also very effective in improving a total and efficient combustion of the fuel, increasing mileage and reducing “Black Smoke” contamination. It stabilizes fuel, and prevents sludge. This is an alcohol-free formula, which helps protect the engine’s gaskets and seals.

Product Characteristics:

- Totally disperses water
- Controls waxing and gelling
- Cleans the entire fuel injection system
- Stabilizes fuel
- Acts as a corrosion inhibitor
- Reduces gum and varnish
- Prevents and eliminates sludge reducing filter clogging
- Controls bacterial growth
- Controls icing
- Improves fuel economy
- Minimizes cylinder wall abrasion
- Combustion improver for greater efficiency
- Reduces exhaust emissions (HC- PM- Black Smoke)
- Reduces NOx and CO emissions
- More engine power and increased fuel economy
- Contains No Alcohols

Description	Item No.	Treats (gal.)
5 Gal Pail	00103	19,200
55 Gal Drum	00104	211,200
